SERVICES

- Constant Temperature LPHW Heating Installation
- Plumbing Installation
- Steam Works
- Fully Automated BEMS Installation
- Oil Tank & Transfer Installation
- Dual Fuel Heating Centre Installation
- Natural Gas Installation
- Thermal Insulation of Piped and Ducted Services

Located in Lisburn, the Lagan Valley Hospital provides fundamental health care services to the city and surrounding area, an estimated 125,000 people.

Refurbishment works meant the removal of steam-powered boilers was necessary in order to update the hospital's heating supply. We therefore removed these along with all pumps and AHU batteries, before re-installing a new dual fuel heating centre, thermal insulation and natural gas supplies.
